1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3 to 6 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Hirata.

Hirata discloses an audio system for an automobile and which is comprised of a radio mounted to the automobile (FM tuner of fig. 1); a plug transmitter plugged (1) into a cigar lighter socket and able to input electrical power from a power source mounted to the automobile 96c); and a portable audio device 98) connected to the plug transmitter 91); wherein the plug transmitter transmits an audio signal from the portable audio device as a radio wave in a receiving frequency band of the radio, and the radio received that radio wave from the plug transmitter and performs an audio output operation from a speaker (col. 3, lines 13-15); and a constant voltage output circuit is further arranged in the plug transmitter, and electric power can be supplied to the portable audio device arranged to the plug transmitter (9a, 9c and 9d).

3. This is in response to the applicant's remark, which was received on September 4, 2003.

On page 6, line 1 to page 7, line 17, the applicant has argued that "Hirata fails to disclose, teach or suggest a plug transmitter able to transmit and audio signal inputted from a portable audio device as a radio wave in a receiving frequency band". The applicant's argument is not persuasive because at col. 3, lines 13 to 15, Hirata does

disclose a plug transmitter able to transmit and audio signal inputted from a portable audio device as a radio wave in a receiving frequency band. The applicant has also argued "neither signal is transmitted or propagated through the air as radio waves". The applicant's argument is not persuasive because "transmitted or propagated through the air" cannot be found in the claims.

On page 7, lines 18 to 26, the applicant has argued that "Hirata fails to disclose, teach or suggest the modulation system recited therein as being 'plugged into a cigar lighter socket' ". The applicant's argument is not persuasive because since the system of Hirata is being used in a vehicle, it is inherent that the modulation system is plugged into a cigar lighter socket.

Regarding applicant's argument on page 8, lines 3 to 9, see above.

The examiner maintains the rejection as set forth above.

4. Claims 2 and 7 to 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2644

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Minsun Harvey whose telephone number is (703) 308-6741. The examiner can normally be reached on Mondays-Fridays from 9:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bill Isen, can be reached on 305-4386. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9314.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 306-0377.
